NOTES

To use *iapws* within your fpm project, add the following to your fpm.toml file:

```
[dependencies]
iapws = { git="https://github.com/MilanSkocic/iapws.git" }
```

- `dp` stands for double precision and it is an alias to `real64` from the `iso_fortran_env` module.
- `l => liquid`
- `v => vapor`

- c => super critical
- s => saturation
- n => unknown
