NOTES

To use *iapws* within your fpm project, add the following to your fpm.toml file:

```
[dependencies]
iapws = { git="https://github.com/MilanSkocic/iapws.git" }
```

- dp stands for double precision and it is an alias to real64 from the iso_fortran_env module.
- l => liquid
- v => vapor

- c => super critical
- s => saturation
- n => unknown
